

TJM PRO SERIES AIR HOSE REEL.

USER GUIDE

Important safety information

- Read this User Guide before use.
- Always wear eye protection when operating air hose reel.
- Do not direct compressed air from hose at yourself or others.
- Do not exceed maximum working pressure.
- Keep hose away from heat, oil, chemicals & sharp edges.
- Check hose for wear before each use, ensure all connections are secure.
- Do not attempt to disassemble, service or repair air hose reel, high tension spring is enclosed within reel. If allowed to unwind in an uncontrolled manner may cause serious injury.
- Do not pull air hose abruptly.
- Hose has warning marker at 1m from full extension, do not pull hose at full extension.
- When retracting the hose, hold hose & guide to retract slowly into the case. Layer hose on reel to prevent bunching inside case.
- Turn off air supply after use.

4X4 EQUIPPED

TJM PRO SERIES AIR HOSE REEL.

Installation

1. Ensure structure to which hose reel is to be mounted to is of sound construction & has adequate space for the reel to swivel.
2. Vertically align mounting bracket & mark fixing hole on surface.
3. Drill suitable size hole & secure mounting bracket (hardware not included).
4. Slide hose reel on to mounting bracket, lock hose reel bracket using the included M6 x 10mm Pan Head screw.

Connecting to Air Supply

1. Connect inlet hose to air supply & air hose reel.

Operation

- To operate, slowly pull hose out to desired length & allow hose to latch. When finished, pull the hose to release latch & while holding hose, allow hose to retract slowly into case while evenly layering hose on reel.
- Turn off air supply after use.
